Mahuli Laghubitta Bittiya Sanstha Limited
Notes to the Interim Financial Statement
For the Quarter ended Ashad 32, 2083

1. Reporting Entity

Mahuli Laghubitta Bittiya Sanstha Ltd. (MLBSL) is a national level “D” class microfinance institution incorporated under company act 2063. Authorized capital is 400 million with 387.49 million issued and 387.49 million paid-up capital. Mahuli Laghubitta has 64 branches currently in operation with head office at Mahuli, Saptari. It has provided microfinance facilities to more than 8,4000 members nationwide. Mahuli Laghubitta aims to integrate all social classes of rural women into one single platform and provides funds for scaling small and medium enterprise activities in all regions of Nepal. Mahuli Community Development Center (NGO) is the origin of Mahuli Laghubitta getting started financial activities more than 26 years back. Mahuli is purely working for rural poor women, entrepreneurs’ groups, small enterprises, and individuals and is more focused on social inclusiveness. The Microfinance is a limited liability company having its shares listed on NEPSE.

2. Basis of Preparation

The condensed financial statements have been prepared on going concern basis and under historical cost conventions except where the standards require otherwise treatment.

2.1. Statement of Compliance

The Condensed financial statements of the entity have been prepared in compliance with Nepal Financial Reporting Standards and Nepal Accounting Standards (hereafter referred as NFRS), laid down by the Institute of Chartered Accountants of Nepal and in compliance with the requirements of the Companies Act, 2063, directive issued by NRB and all other applicable laws and regulations and amendments thereto.

The disclosure made in the condensed interim financial information’s have been based on the formats prescribed by Nepal Rastra Bank.

The Interim Financial Statement doesn't include all of the information required for a complete set of NFRS condensed financial statements. However selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the microfinance's financial position and performance.

2.2. Functional and Presentation Currency

The Condensed financial statements of the Microfinance are presented in Nepalese Rupees, which is the currency of the primary economic environment in which the company operates. There was no change in microfinance’s presentation and functional currency during the period under review.

2.3. New Standards issued but not yet effective

Management has issued its assumptions and understandings for the preparation of condensed financial statements under compliance with NFRS, however, certain interpretations might vary regarding the recognition, measurement and other related provisions where the standards are not specific and not clear.

3. Use of Estimates and Judgements

The Microfinance, in order to comply with the financial reporting standards has made accounting judgements as having potentially material impact on the financial statement. Those judgements and their impact on the financial statement have been described herein. The management believes that the estimates used in the preparation of the financial statement are prudent and reasonable. Actual results may differ from the estimates. Any revision to the accounting estimate is recognized prospectively in the current and future period.

4. Changes in Accounting Policies

The Microfinance applies its accounting policies consistently except where deviations have been explicitly mandated by the applicable accounting standards.

5. Significant Accounting Policies

The principal accounting policies applied by the Bank in the preparation of these condensed financial statements are presented below. These policies have been consistently applied to all the years presented unless stated otherwise. The most significant areas of assumptions and estimation applied in the application of accounting policies that have the most significant effect on the amounts recognized in the financial statements are listed hereinafter and their description follows:

- Fair value of financial instruments

- Classification of financial assets and financial liabilities
- Impairment losses on financial assets
- Useful economic life of property and equipment
- Provisions for liabilities, commitments and contingencies

5.1. Basis of Measurement

The Condensed financial statements of entity have been prepared on the historical cost basis, except where the standards require otherwise treatment as follows.

- Investment Securities (investment in equity instruments) are measured at fair value under NFRS 9 ‘Financial Instrument’.

5.2. Cash and Cash Equivalents

The cash and cash equivalents include cash in hand, balances with banks and financial institutions, money at call and short notice and highly liquid financial assets with original maturity of three months or less from the acquisition date that are subject to and insignificant risk of changes in their fair values and are used by the microfinance in the management of its short-term commitments.

Cash and Cash equivalents include cash in hands, deposits with BFIs and other short-term investments with original maturities of three months or less.

5.3. Financial Assets and Financial Liabilities Recognition

The Microfinance recognizes financial assets and financial liabilities on the date it becomes party to the contractual agreement (trade date) and recognizes changes in fair value of the financial assets or financial liabilities from that date.

Classification and Measurement

Financial Assets

Financial Assets are classified mainly under amortized cost, fair value through profit or loss and fair value through OCI. Financial Liabilities are classified at amortized cost or fair value through profit or loss.

5.3.1. Measured at Amortized Cost

Financial assets that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows that are solely payments of principal and interest, are subsequently measured at amortized cost using the effective interest rate (‘EIR’) method less impairment, if any. The amortization of EIR and loss arising from impairment, if any is recognized in the Statement of Profit and Loss.

5.3.2. Measured at Fair Value through OCI

Assets are categorized under this category if the business model is to obtain the contractual cash flow from the assets but the contractual cash flow isn’t solely repayment of principal and interest.

Equity Instrument which are not held for trading and initially recognized as held for trading for which the Microfinance makes an irrevocable election to carry the changes in fair value of the instrument through OCI are measured at Fair Value through other Comprehensive Income.

5.3.3. Measured at Fair Value through Profit & Loss

The Microfinance classifies the financials assets as fair value through profit or loss if they are held for trading or designated at fair value through profit or loss.

Any other financial asset not classified as either amortized cost or FVOCI, is classified as FVTPL.

Financial Liabilities

5.3.4. Measured at Fair Value through Profit & Loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Upon initial recognition, transaction cost i.e. directly attributable to the acquisition are recognized in Statement of Profit or Loss as incurred. Subsequent changes in fair value are recognized at profit or loss.

5.3.5. Measured at Amortized Cost

All financial liabilities other than measured at fair value through profit or loss are classified as subsequently measured at amortized cost using effective interest method.

5.4. Derecognition

The Microfinance derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the contractual rights to receive the cash flows from the asset.

A financial liability is derecognized when the obligation specified in the contract is discharged, cancelled or expires.

5.5. Determination of Fair Value

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Microfinance follows three levels of the fair-value-hierarchy as described below:

Level 1: Quoted (unadjusted) prices for identical assets or liabilities in active markets;

Level 2: Significant inputs to the fair value measurement are directly or indirectly observable or valuations of quoted for similar instrument in active markets or quoted prices for identical or similar instrument in inactive markets; and

Level 3: Significant inputs to the fair value measurement are unobservable.

Investment in Unquoted Equity Instrument are carried at cost as the market price of such shares could not be ascertained with certainty at the reporting date.

5.6. Impairment

The microfinance has applied the impairment requirement of NFRS 09 to financial assets measured at amortized cost. Under NFRS 09, the impairment of financial assets is addressed using an Expected Credit Loss (ECL) model, which requires entities to estimate the potential losses arising from credit risks over the life of a financial asset. This model applies to financial assets measured at amortized cost or fair value through other comprehensive income (FVOCI), as well as lease receivables, trade receivables, contract assets, and certain loan commitments and financial guarantee contracts. NFRS 09 necessitates recognizing an impairment loss either at a 12-month ECL if there is no significant increase in credit risk since initial recognition, or at a lifetime ECL if the credit risk has increased significantly.

Recognition and measurement:

5.6.1. The microfinance has applied NAS-16 “property, plant and equipment” for accounting Property, plant and equipment. The microfinance has applied cost model to all Property, plant and equipment less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset.

5.6.2. Depreciation & Amortization:

The Microfinance depreciates property, plant and equipment following Written Down Value method applying the Depreciation rates prescribed by Income Tax Act, 2058. The rates used for depreciation of assets for the current and comparative period of significant items of property, plant and equipment are as follows:

Asset Category	Depreciation Rate per annum
Freehold Buildings	5%
Motor Vehicles	20%
Computer & Accessories	15%
Furnitures & Fixtures	25%
Office Equipment-Core	15%
Office Equipment-Non-Core	25%

5.7. Goodwill and Intangible Assets

Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired in Business Combination is recognized as goodwill. Goodwill is measured at cost less any accumulated impairment losses/accumulated amortization. Goodwill is reviewed for impairment annually, or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

Intangible assets are recognized separately from goodwill when they are separable or arise from contractual or other legal rights, and their fair value can be measured reliably. These intangible assets are recognized at historical cost less impairment /amortization over their estimated useful life. Intangible Assets, except for goodwill, are amortized on a straight-line basis in the Statement of Profit or Loss from the date when the asset is available for use, over the best of its useful economic life based on a pattern in which the asset’s economic benefits are consumed by the Microfinance. Amortization methods, useful lives, residual values are reviewed at each financial year end and adjusted if appropriate. The Microfinance assumes that there is no residual value for its intangible assets.

Asset Category	Estimated Useful Life
Computer Software	5 years

5.8. Tax Expenses

Tax expenses comprise of current tax and deferred tax. Current tax is the income tax expense recognized in the statement of Profit or Loss, except to the extent it relates to items recognized directly in equity or OCI in which case it is recognized in equity or in other comprehensive income. Current tax is the amounts expected or paid to Inland Revenue Department in respect of the current year, using the tax rates and tax laws enacted or substantively enacted on the reporting date and any adjustment to tax payable in respect of prior years. Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the balance sheet and the amounts attributed to such assets and liabilities for tax purposes.

5.9. Deposits from Members

Deposits from members are initially recognized at fair value, plus for those financial liabilities not at fair value through profit and loss. The transaction price is considered as the fair value for measuring the deposits. These are classified as financial liabilities measured at amortized cost.

5.10. Provisions, Liabilities and Contingent Liabilities

A provision is recognized, if as a result of a past event, the Microfinance has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. The amount recognized is the best estimate of the consideration required to settle the present obligation at the reporting date, considering the risks and uncertainties surrounding the obligation at that date. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate and are reversed if there is no probability of outflow of resources.

5.11. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to Microfinance and the consideration can be reliably measured. The following specific recognition criteria shall also be met for revenue recognition.

5.12. Interest Income

For all financial instruments measured at amortized cost, interest income or expense is recorded using the Effective Interest Rate (EIR). The calculation of effective interest rate includes all charges and fee paid or received that are integral part of the effective interest only if considered material. Such charges are not amortized over the life of the loan and advances as the income so recognized closely approximates the income that would have derived under effective interest method and are recognized directly in statement of profit and loss.

5.13. Fees and Commission Income

Fees and commissions are generally recognized on an accrual basis when the service has been provided.

5.14. Dividend Income

Dividend income received from equity shares is recognized in the books when the right to receive the dividend is established.

5.15. Interest Expenses

Interest expense on all financial liabilities including deposits is recognized in statement of profit or loss using effective interest rate method. The Microfinance uses ASB carve- outs and treat coupon rate as effective interest rate.

5.16. Employees Benefits

Employee benefits include all forms of consideration given by an entity such as salary, allowances, paid leave, accumulated leave, gratuity, provident fund and annual statutory bonus in exchange for service rendered by employees for the termination of employment.

5.17. Defined Contribution Plan

A defined contribution plan is a post-employment plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay a further amount. Obligations for contributions to defined contribution plans are recognized as expense in the profit or loss as and when they are due. The Microfinance operates a defined contribution plans as provident fund contribution of its employees and defined benefit plans for the Gratuity and leave payment requirement under its staff rules

5.18. Defined Benefits Plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

Gratuity and Leave Benefits are Defined Benefit Plans. The Entity annually measures the value of the promised retirement benefits for gratuity, which is a Defined Benefit Plan. Actuarial Valuation of Defined Benefit Plan has been carried out as per the requirement of NAS 19 – Employee Benefits. Gain or loss arising as a result of changes in assumptions is recognized in other comprehensive income (OCI) in the period in which it arises.

5.19. Leases

Under NFRS 16, a lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee. This classification requires the lessee to recognize both a right-of-use asset and a corresponding lease liability on the balance sheet at the lease commencement date. The lease liability is measured at the present value of future lease payments, while the right-of-use asset is initially measured at the lease liability amount, adjusted for lease payments made at or before the commencement date, plus any initial direct costs. Over the lease term, the right-of-use asset is depreciated, and the lease liability is reduced by lease payments with interest expense recognized on the liability.

5.20. Share Capital and Reserves

5.20.1. Share Capital

Financial instruments issued are classified as equity when there is no contractual obligation to transfer cash, other financial assets or issue available number of own equity instruments. Incremental costs directly attributable to the issue of new shares are shown in equity as deduction net of taxes from the proceeds.

Dividends on ordinary shares classified as equity are recognized in equity in the period in which they are declared. Shares issue expenses which can be avoided for the issue was charged in the year of issue of shares directly through equity and disclosed in the statement of changes in equity. Tax impact is also disclosed accordingly.

5.20.6. Regulatory Reserve

The amount that is allocated from profit or retained earnings of the microfinance to this reserve as per the directives of NRB for the purpose of implementation of NFRS and which shall not be regarded as free for distribution of dividend shall be presented under this reserve. The regulatory reserve of the microfinance includes re-measurement adjustments such as interest income recognized against interest receivables, difference in loan loss provision as per NRB directive and impairment on loan and advance as per NFRS, amount equals to deferred tax assets, actual loss recognized in other comprehensive income, amount of goodwill recognized under NFRS, etc.

5.20.7. Client protection fund

Client protection fund is created at 2% of net profit. as per NRB Directives.

5.20.8. Earnings per Share (EPS) including diluted EPS

Microfinance presents basic and diluted Earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit and loss attributable to ordinary equity holders of the microfinance by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting both the profit and loss attributable to the ordinary equity holders and the weighted average number of ordinary shares outstanding, for the effects of all dilutive potential ordinary shares such as share options granted to employees and hybrid capital instruments. The microfinance does not hold any dilutive potential ordinary shares, and as such the Basic EPS and Diluted EPS are same during reporting period.

6. Segment Reporting
